

AEROMODELING WORKSHOP

On 19th of November, 2016, a workshop on 'Aeromodeling' was conducted by "Aerosports", one of the pioneers in this domain. "Aerosports" is a wing of the Aero Modelers Association of India. Students from Grade V to VIII participated in the one day workshop. They enjoyed learning about the basics of aero modeling and design. They had hands on learning sessions and designed a flying model that was guided by the resource person from 'Aerosports'. Students learnt about the four important forces, Lift, Thrust, Drag and Weight which are foremost parameters in designing a flying object.
